Rolling stones songs listen

The Rolling Stones | Matt Cardy/Getty Images
The Rolling Stones are not only the biggest rock n'roll band of all time, but probably the oldest as well at this point. The Stones have been cycling through a fair amount of members over the years, with a core dynamic between strutting frontman Mick Jagger and songwriting blues-man guitarist Keith Richards anchoring the group through his many albums and tours over the years. With such a prolific, long-age and legendary band, any top 10 on the list could make completely different songs and still be as valid as the next. The top 10 list you see below is subjective and consists of sacrifices - the songs it pains me to dismiss, but leave me. These are my 10 best Rolling Stones songs.
10th Dead Flowers
Dead Flowers should not work as well as it does. Listen to Mick Jagger's swaggering parody of the country accent, and it feels like the band is having a lark. This steel-guitar lymg track also works as both a weepy country bar ballad and a parody one, thanks to skillful playing - Keith's guitar has rarely sounded so cute - and a blend of instruments that makes Dead Flowers sound like a proper distillation of cosmic American music, Stones-collaborator Gram Parsons worked so hard to create. Stones didn't even have to be American to lead it.
9. Angie
One of the Stones' loveliest, most delicate ballads is predictably about a more lurid theme - a claim David Bowie then a woman when he allegedly caught his wife and Jagger in bed together - but that can't diminish the sadness and longing evident in every strummed note. Pianos, acoustic guitar and Jagger's desperate vocal performance make Angie one of the band's greatest of all time.
8th Can't you hear me knocking?
This place could be just one Brown Sugar or almost every other song from Sticky Fingers, my personal favorite Stones album and a contender for my favorite album of all time, but can't you hear me knocking? wins because of its height. The song begins with a standard rocker, built on a jave, average monster riff only Richards could have come, before breaking up with an epic stretch of seven minutes of guitar riffing, sexy saxophone, conga drums, and more. This is a real investigation, effortlessly combining two things into one unlikely, endlessly satisfying whole.
7. Beast of Burden
Like so many Stones songs, Beast of Burden is a song whose quality far exceeds its complexity. It's just a sexy slow jam, but the swaggering vocals and beautiful guitar interplay make for sexy slow jam. There's not much to say about a song that works just because it sounds so deeply felt - a testament to the soulful playing and songwriting of this group of these British boys in Kent.
6th Rocks Off
The Opening Track in Exile on Main Street, often considered the band's masterpiece, kicks things off with a bar fight tune that could have been forgettable by another band With the Stones, it sounds alive and electric as one of their live shows contained four and a half minutes of pure hearing bliss - ripping the guitar, the swelling, the horns that come halfway through to help the song's epic, satisfying buildup.
5. Paint It Black
Long Before Goth and Grunge, the Rolling Stones enhanced the art of black-hearted depression in a musical form with its sitar-infused Paint It Black. One of their all-time greatest singles, moody, poetic lyricism helps distract from the fact that it's essentially the perfect pop song painted in darker colors (get?), built on several endlessly catchy melodies and a plodding drum beat and guitar riff that gives the whole thing an added, almost primal edge.
4. You can't always get what you want
from the Rolling Stones built into one of their greatest epics after their own, something of earth-breaking. From another rural opening, we feel no storm coming, one delivered in the last minute when Mick Jagger and guest singer Merry Clayton shout out the recurring chorus. It's a song that has a perfect mood, and like the Stones themselves, its crafted loose ends of other genres - from soulful vocals to blues to harmonica - into something entirely of their own, something of earth-breaking. There's nothing better in the world than a good friend- except, perhaps, a good song about friendship. A theme that goes all — from pop and rap to electronic and state - musical artists have been pondering and praising the friendship of the time immemorial. Unfortunately, we don't have recordings of an ancient etruscan or Sumer's odes by friendship, but we still have a few drug tracks on this Spotify playlist, from Biz Markie to Bette Midlerin. Grab a friend and listen to the best songs of friendship.
Deep Fried Frenz by MF Doom (2004) [Amazon, iTunes]
Deep Fried Frenz, the fifth track off MF Doom food related 2004 album Mm... Food, try an old-school rap song by Whodini called Friends, so you kinda get two friendship-themed songs in one. If you're a friend of the masked rapper, don't worry. He really doesn't want to deep fry you. But he wants to know who his real friends are. Hip-hop may be a tough game, but it's better for some quality pals. Just a friend of Biz Markie (1989) [Amazon, iTunes]
Poor Biz Markie can't catch a break in this 1989 lamenting forlorn groupee love, in which the Clown Prince of Hip-Hop meets a girl during a concert and, after trying to date her, discovers she is already a man - who she insists is just a friend. This single was a one-hit wonder and Biz Markie hasn't been able to climb the charts since (appearing on reality shows and men in Black II instead), but what a wonderful hit it is. Just Friend is now on the dance floor to sing-along and a reminder that friendship can be bittersweet. You've got a friend of me
Randy Newman & Lyle Lovett (1996) [Amazon, iTunes]
Toy Story franchise and its theme song, You've Got a Friend in Minus offers another bittersweet take on friendship. The song - written by Randy Newman and performed by a duet with Newman and Lyle Lovett - is the perfect tribute to friends to help each other when times get tough. I'll be there for you
Rembrandts (1995) [Amazon, iTunes]
We'll be bittersweet syrup with I'll be there for you
Rembrandts, best known as an irritating yet memorable theme song from TV show friends, making it a reluctantly fitting story in this playlist. We're so sorry. It has some nice and appropriate feelings about friendship though, we promise! I'll be there for Jackson 5 (1970) [Amazon, iTunes]
I'll be there, Jackson 5 soul singing soul buddies catapulted into the quintet outside the realm of just chewing gum pop into the stratosphere, according to no less authority than Michael Jackson himself. If you want more, I'll be there for your listening, watch Mariah Carey's equally powerful MTV open rendition. You're my best friend queen (1975) [Amazon, iTunes]
So far our songs of friendship are pretty simple and you're my best friend queen is no exception. Written by the band's bassist John Deacon - who also offers these Wurlitzer piano notes - it's a catchy pop ballad about Deacon's relationship with his wife and the joys of friendship that develops in marriage. Stand by me
Ben E. King [Amazon, iTunes]
Ben E King's R&B classic has scaled the Billboard charts twice: First, when it was released in 1961, then in 1986, when it was re-released, which coincides with a blockbuster coming-of-age film of the same name, showing the song's timeless appeal. Both versions of Stand By Me have anthemic monuments to childhood camaraderie. Lean On Me by Bill Withers (1972) [Amazon, iTunes]
A friend needs to have a friend indeed, as they say, and Lean On Me Bill Withers is a mixed expression of that sentiment. This song topped the Billboard charts twice: Withers original went to number one in 1972, then Club Nouveau cover top spot in 1987, as well as winning a Grammy for Best R∓ B Song. With a little help from my friends
Joe Cocker (1968) [Amazon, iTunes]
With Little Help From My Friends was first recorded by this British band called the Beatles - maybe you've heard of them. In this case though, we went with a Joe Cocker rendition, which is a friendship-themed classic in its own right, slower and bluesier than the poppy Beatles version. This version of With A Little Help My Friends also found a new life 20 years after its release as the theme song of the nostalgic series Wonder Years. Umbrella by Rihanna (2007) [Amazon, iTunes]
When the sun shines, we shine together / I told you I'm here forever / Said I always friend / Took the oath I'm to stay it out until the end. Is the expression of friendship better than that?
Rihanna had a string of early successes ahead of Umbrella, but this 2007 single was her breakthrough hit, making her the chart-topping titan she is today. It's also an 80-year-old and danceable tune about the eternal bond between friends. I remember you as Sarah McLachlan (1995) [Amazon, iTunes]
Friendship is all about being honest with someone. For example, hypothetically, let's say you thought Sarah McLachlan's I Remember You were super schmaltzy and worn out, but we thank every time they played it at their In Memoriam tribute award shows, or every time they played it at graduation ceremonies. You want to be honest with your friend. Hypothetically, of course. Cry not for memories. We're going to try. Sarah! Thank you for being a friend of Andrew Gold (1978) [Amazon, iTunes]
Never take a good friend for granted. Always thank them for being a friend, as the 1978 Andrew Gold song reminds us. Later re-recorded by Cynthia Fee as the theme song for the NBC series Golden Girls, this tune includes such heartwarming notes of friendship as If it's a Car You Don't Have! I'll Definitely Buy You a Cadillac, and some weirder lines like, And when we die / And float away / Into the night / Milky Way / You can hear me call. Best friends forever, indeed. You got a friend of James Taylor (1971) [Amazon, iTunes]
writing and recording You've Got a Friend was using friendship. Written by Carole King, it was then recorded simultaneously on both of her album, Tapestry. James Taylor's Mud Slide Slim, King and Taylor share the same backgrounds as musicians. The two were married for a few years, and even after the divorce, they stayed close. Now that's a beautiful friendship. The boys are back in town with Thin Lizzy (1976) [Amazon, iTunes]
So you and your best buds are reuniting at the bar a few years after graduation. What song are you going to be more than friends. Good luck, Mr. Cent. Graduation (Friends Forever) by Vitamin C (1999) [Amazon, iTunes]
Here's a high school graduation staple. It's about moving and growing and getting big jobs and big money, but still being friends with the people you palled around at school with. It's both nostalgic for the past and excited about the future. And it's based on Pachelbel's Canon D, so it's timeless. No New Friends by DJ Khaled, Drake, Rick Ross & Lil Wayne (2013) [Amazon, iTunes]
Friendship is very important for rappers. It's so important, in fact, that they tend to be a little hesitant about new friends, so it's a collaborative story with DJ Khaled, Drake, Rick Ross and Lil Wayne. Sure, they may seem threatening and heavy in color at first, but beneath the surface, they're just a bunch of lon guys who love their friends. As long as they're not new. Count Me By Bruno Mars (2011) [Amazon, iTunes]
What should friends do? Ask Bruno Mars. You can count on me like 1, 2, 3! I'll be there, and I know when I need it. Good friends can count on each other if necessary, as this single from Bruno Mars' debut album Doo-Wops & Hoologans confirms. I look forward to seeing a friend of the Rolling Stones (1981) [Amazon, iTunes]
members of the Rolling Stones, especially Mick Jagger and Keith Richards, need to know a thing or two about a friendship. After all, they've all been friends (or at least colleagues) for about half a century now. So you can trust their words when Jagger sings: I'm not expecting a lady, I'm just waiting for a friend in this 1981. By then, Jagger & Richards had mellowed out a bit, and stopped to appreciate the finer things in life, such as their partnership and friendship. Internet Friends by Knife Party (2011) [Amazon, iTunes]
Be careful who you friend on the internet is basically a message on this electro house/brostep dance track. This girl you're trying to pick up online can go crazy - especially if you block her on Facebook - and break into your house. Pump it up and let the crunch synthesizers overload you, bro. All my friends at LCD Soundsystem (2007) [Amazon, iTunes]
Another dance song of friendship, except this one doesn't sound like your cat knocks all the pots and pans off the counter. Instead, all my friends at LCD Soundsystem sounded like the Killers listened a lot to Krautfunk, then decided to make a club banger, some piano chords thrown for good measure. The lyrics themselves are pretty great, too, tracking the rise and fall of friendship, with lines like: It Comes Together/How It Makes Bad Movies. Perfect for a melancholic dance. The Wind Under My Wings by Bette Midler (1989) [Amazon, iTunes]
This 1989 hit, first recorded by Bette Midler for the movie Beaches, takes the friendship appreciation across the nother level. Midler sings: Have you ever known that you are my hero / You are I wish I could fly higher than the eagle/ Because you're the wind under my wings. That's a lot of praise. My best friend Weezer (2005) [Amazon, iTunes]
Weezer has never really known for its subtlety. They tell you straight up on what they're all about and there's something refreshing about it. They keep that simple style for my best friend, with a chorus that says: You're my best friend/ and I love you, and I love you / Yes I do. It's just great. Weezer. Thanks ton. We go friends by White Stripes (2002) [Amazon, iTunes]
Remember when you were young and all you cared about was the first day of school and new friends. We're going to be friends, off White Stripes' third album White Bloods, hitting that childhood anxiety and excitement perfectly. The lyrical and musical composition is simple, like a lullaby, and by the end of the song, you're fully transported back to those early school and friendship days. Happy With Turtles (1967) [Amazon, iTunes]
Okay, listening to this sunshine-pop oldie is a bit like chugging maple syrup, but whatever, it's a lovely and catchy song about love and friendship. If you and your friend are so happy that the sky is blue when you're together, you know you have a good thing going on. Wannabe by the Spice Girls (1996) [Amazon, iTunes]
If you want to be my lover, you have to get along with your friends. What to say, Spice Girls? Unless you insist. Wannabe was the anthem girl power philosopher the pop group embraced, singing female friendship and empowerment. It was written in less than 30 minutes, which just shows how creatively inspiring friendship can be. Clique by Kanye West, Jay-Z & Big Sean (2012) [Amazon, iTunes]
Big Sean would remind you that no group of friends is close to his group of friends, which includes members of good music (like Big Sean and Pusha T), Jay-Z and label head Kanye West. If you and your friends want to feel like a good music clique, turn on and turn on The Clique. No one's fresher. Big Brother by Kanye West (2007) [Amazon, iTunes]
Kanye West again. Since her 2007 album Graduation, Big Brother has been a touching tribute to her mentor and friend, Jay-Z. In the song, Kanye discusses how Jay-Z inspired him in the early days, giving him the opportunity to produce and rapping, then how a friendly sibling rivalry forced Kanye to evolve as an artist. Big Brother is a rare thing: a quality, heartfelt rap song about brotherly love. Friends of Elton John (1971) [Amazon, iTunes]
Friends was the only single off the album Friends, the soundtrack to a deranged film called Friends. So, if you don't know what this is about, you don't know anymore. Recorded just before Elton John and collaborator Bernie Taupin made a great US, Friends is a brief and sweet greeting friendship. Stay Free by the Clash (1978) [Amazon, iTunes]
You don't expect snarling, snarky punk clothes like The Clash to record a typical song of friendship, and Worry, they didn't do it. In Stay Free, they detailed a childhood friendship full of causing trouble during and after school, playing in the pool and smoking cigarettes. Then one of the friends hits the wrong guy and goes to jail. The end of the song is so ominous and hopeful: Go calmly ... step lightly ... Very good 9/11. Never been a friend like me at 2Pac (1997) [Amazon, iTunes]
Rappers have been boasting a lot. Swagger is just something that comes with territory. But usually they brag about how many cars or gold chains they have, not about how big and unique a friend they are. In never had a friend like me, 2Pac did the last. He allegedly wrote it to his close friend and boss at the Death Row Archive, Suge Knight. Pinegrove's New Friends (2016) [Amazon, iTunes]
As we get older, it can be harder and harder to make new friends. Pinegrove's great song on this subject is the solution to this problem, a new social beginning that begins with a resolution to meet new people. As the song says: What's the worst that can happen? Real friends from Kanye West (2016) [Amazon, iTunes]
When you rise to any form of success, it can be hard to tell who your true friends are. The theme of Kanye's classic-era-sounding new single is the kind of friendship in which one side actually cares about the other's feelings and emotions, not what they get from them. Summer Friends by Chance the Rapper (2016) [Amazon, iTunes]
Chance The Rapper's song highlights the fleeting nature of warm-weather friendships, where people meet on the street, interacting in a happy universe that seems to disappear in the fall. Andy Shauf (2016) [Amazon, iTunes]
A song about a disagreement between two friends at a party leading to a cathartic late-night smoking session that you're a pleasant and somewhat worn love letter to a friendship that perfectly encapsulates the emotionally awkward person inside of us all. Thank You Friends by Big Star (1978) [Amazon, iTunes]
It's never the wrong time to thank your friends for helping with their success, and that's just what the iconic classic rockers of Big Star do here. Rocking a jam that highlights all the people responsible for your good times, this song is the perfect thing to put in when you're surrounded by those you love but just don't quite have the right words. Friends (Feat. Bon Iver) by Francis and the Lights (2013) [Amazon, iTunes]
Friendship can cross the distance and bad deeds, as explained by songwriter Justin Vernon (Bon Iver) in his guest verse francis and lights friends. I don't want to know if you made mistakes/ I'm still waiting for your sunshine, singing the Wisconsin-based singer on the runway, an anthem cut worthy of a late-night bonfire. Why can't we be friends with war sisters (1975) [Amazon, iTunes]
Ironic as it is, a band called War wrote one of the most iconic songs coming together for peace and friendship. Reggae-influenced single about each other's acceptance, regardless of nationality, religion or The song reminds us that as long as you're able to forgive and empathy, there's no real reason why you can't get along with someone. Just friends with Amy Winehouse (2006) [Amazon, iTunes]
If you get along really well with someone you're interested in, it can be hard to be just friends - even if you want to be. It's a conundrum to explore legendary soul singer Amy Winehouse just friends, one about the deep desire for friendship in the face of strong emotions. My Friends red hot chili peppers (1995) [Amazon, iTunes]
Real friends support each other, even in their darkest moments. On My Friends, The Red Hot Chili Peppers focus on the deep love that keeps important friendships together, even when things like depression - and a bit of jail time - get in the way. Friendship Test Tenacious D (2001) [Amazon, iTunes]
Sometimes you have to make sure your best friends aren't romantically interested in you, and that's just what comedian Jack Black does with this short skit track from his band Tenacious D. Remember: Real friends always pass the test. Chris Stapleton's Friendship (2017) [Amazon, iTunes]
Country singer Chris Stapleton wrote this soulful tune about the kind of friendship that lasts through and thin. Whether borrowing someone money, food or shoulder crying, best friends offer each other what they need it, regardless of the circumstances. All my friends jacob sartorius (2017) [Amazon, iTunes]
There's nothing better than hanging out with half of his best friends until dawn, and it's the central theme of this pop anthem from Jacob Sartorius, which encourages young friends to stay together until dawn. All My Rowdy Friends (Have Settled Down) by Hank Williams Jr. (1981) [Amazon, iTunes]
Friendships go through several stages over the years, from rowdy half days of youth porch-swinging days to retirement. Country hero Hank Williams Jr. addresses it with his hilarious and rambling anthem, singing: Nobody wants to get drunk and loud / All my rowdy friends have calmed down. Friends of Meaghan Trainor (2016) [Amazon, iTunes]
I know we're about to have a good time/ because I got all my friends with me, singing Meaghan Trainor to open this soulful pop jam, vocal-driven single about how your closest friends lift you even when times get tough. The Reunion of Friends by John Williams (2002) [Amazon, iTunes]
There may not be any lyrics inside this 5-minute orchestral number of legendary film composer John Williams, but that doesn't mean that the cathartic feeling of friendship isn't an abundance throughout. Written in the Harry Potter franchise, Reunion with Friends is a gentle and hopeful composition that offers the perfect soundtrack for getting along with its best and oldest partners in life.
